

FOR IMMEDIATE RELEASE

SPECTRUM-DYNAMICS RECEIVES CE MARK

Orangeburg NY, Jan 26th, 2009 – Spectrum Dynamics announced today that it has received the CE Mark and is preparing for sales and distribution of the revolutionary D-SPECT platform in Europe. Working in concert with their distribution partner, Cyclopharma, the company is moving rapidly into phase II of its strategic plan, distribution outside of North America.

"The CE Mark Certification provides Spectrum-Dynamics with the necessary endorsement to market our products throughout the European Community (EU). This recent CE Mark approval of the D-Spect cardiac scanner system is another significant milestone for our company. Additionally with over 20 successful installations throughout the US and hundreds of patients being imaged every day on the D-SPECT, moving into one of the largest Nuclear Medicine markets outside of the US was the next logical step" stated Jim Haisler, CEO of Spectrum Dynamics.

"The D-SPECT camera represents a true breakthrough in nuclear cardiology imaging opening up new doors that previously were closed" said Josh Gurewitz, VP of Sales and Marketing. "Prior to D-SPECT, calculation of absolute flow, simultaneous multi isotope acquisitions, significant dose reductions and 2 minute gated SPECT studies were simply not possible, now some are already in commercial practice and the others are in our development pipeline. We are extremely excited to see this exciting technology enter the European market in 2009.

About Spectrum-Dynamics:

Spectrum-Dynamics, with offices in New York, California and research and development facilities in Caesarea Israel, is a pioneering medical device company focused on personalized molecular imaging and applications. Spectrum Dynamics will revolutionize the practice of nuclear cardiology, and eventually all nuclear medicine applications, by dramatically enhancing workflow and providing new clinical applications not possible with conventional technology.
