

**FOR IMMEDIATE RELEASE**

**BAPTIST CARDIAC & VASCULAR INSTITUTE in MIAMI, FL INSTALLS  
SECOND D-SPECT™ SYSTEM IN THE UNITED STATES**

**Orangeburg NY, March 27, 2007** – Spectrum Dynamics (USA) Inc. today announced the second U.S. installation of its D-SPECT system at the Baptist Cardiac Vascular Institute located in Miami, FL. The D-SPECT system with BroadView™ imaging technology represents a breakthrough in almost every component of nuclear cardiology imaging workflow and diagnostics. The D-SPECT is an entirely new technology designed to transform the nuclear medicine imaging market by significantly reducing acquisition time while improving sensitivity and resolution.

Baptist Cardiac & Vascular Institute is part of the Baptist Health South Florida, the largest not-for-profit health care organization in the region. Affiliates include Baptist Hospital of Miami, Baptist Children's Hospital, South Miami Hospital, Homestead Hospital, Mariners Hospital, and Doctors Hospital. Baptist Health also offers a variety of health care services, such as outpatient diagnostic and treatment facilities and home health care

BroadView imaging technology provides improved sensitivity by collecting photons using larger collection angles, a novel design of scanning solid state detectors and proprietary image reconstruction techniques. This technology has produced an imaging platform capable of acquiring patient data up to 10 times faster than a conventional sodium iodide based system, and has the potential to provide clinicians with cardiac flow data. "Spectrum Dynamics is pleased that the second U.S. install of the D-SPECT is at Baptist Cardiac Vascular Institute," said Josh Gurewitz, Vice President of Marketing. "We are excited to work with their team and help them provide cutting-edge technology to their patients." The next U.S. installations of the D-SPECT will be at Brigham and Women's Hospital in Boston, and Vanderbilt University Medical Center in Nashville.

## **About Spectrum Dynamics**

**Spectrum Dynamics LLC**, is domiciled in Jersey, and has offices in New York, California and research and development facilities in Haifa Israel, is a pioneering medical device company focused on personalized molecular imaging and applications. Spectrum Dynamics will revolutionize the practice of nuclear cardiology, and eventually all nuclear medicine applications, by dramatically enhancing workflow and providing new clinical applications not possible with conventional technology. Additional information can be found at [www.spectrum-dynamics.com](http://www.spectrum-dynamics.com)

## **Statement**

. This press release may contain forward-looking statements about Spectrum Dynamics, including projections about our business and the nuclear medicine market. Those forward-looking statements are not guarantees of future performance and actual results could differ.
