

Field Service Engineer, North East US

Location: North East US

Company Summary

Started in 2000 in Israel, Spectrum Dynamics is today a leading company in the development and commercialization of nuclear medicine capital equipment and software solutions. Initially the company focused on cardiac SPECT (single photon emission computer tomography) where Spectrum led a number of key innovations leading to improved imaging quality, patient throughput, lower radiation dosage for patients and ultimately improved diagnostic accuracy. After gaining the # 1 position in cardiac ahead of industry giants like GE, Siemens and Philips the company focused its attention on full body imaging market 16X larger than cardiac. Utilizing the tried-and-proven technology from cardiac combined with innovative new scanning methodology Spectrum unveiled its industry-transforming multi-organ scanner VERITON and VERITON-CT in October 2017. Like the cardiac product VERITON brings significant benefits to clinicians, hospital administrations and patients alike which will allow the company to enter a phase of high transformational growth in coming years. The company has offices in Switzerland, USA, Israel, Hong Kong, Shanghai and Tokyo and is today a fast-growing, truly global, company.
