

Morges, Switzerland; July 19, 2019 For Immediate Release

Spectrum Dynamics Medical announced today that its board of directors has appointed Gilad Yoeli the new Chief Executive Officer of the company effective immediately as Michael Joos steps down after four years in the role.

Gilad previously held the roles of Chief Financial and Operations Officer of Spectrum Dynamics. With over 12 years in the company his wealth of executive experience makes him an excellent choice to lead it through this next growth phase. Other prior roles include Chief Financial Officer at CoreFlow, and Senior Manager at Ernst & Young. Gilad graduated the University of Haifa with a bachelor's degree in Economics and has spent his career in roles of increasing responsibility giving him a great range of exposure and leadership in business planning, medical devices, entrepreneurship, venture capital, and biotechnology.

Gilad has been a part of Spectrum Dynamics since the first commercial orders were received many years ago and has been an integral part of the journey from start up to the current growth phase. "These are exciting times for Spectrum Dynamics" Gilad said. "We are known to industry as the digital nuclear medicine company having proven ourselves first with the D-SPECT® cardiac system and now the VERITON® is showing its immense capabilities with unprecedented image quality and speed." The company remains singularly focused to deliver results. "We will become the number 1 player in the digital detectors based multi purpose systems market, just like we did in the dedicated digital cardiac space. We will introduce innovative imaging and therapy guiding applications enabled by this new technology. Our focus has been and will continue be fulfilling our customer needs."

"I am confident that Gilad will lead the company to great success and wish him best of luck", said Yoel Zilberstien, founder of Spectrum Dynamics Medical.
